QC444-411-5 Clearance 4-Channel Surveillance Bundle

AT A GLANCE:

- 4 Channel H.264 CIF/D1 DVR
- 500GB Hard Drive
- Four cameras with 400TV Lines of Resolution
- Weatherproof cameras for indoor or outdoor use
- 40 feet of night vision
- Email Alerts
- Mobile Phone Surveillance
- Compatible with MAC and PC
- Remote internet monitoring (up to 10 users at the same time)

Just because you've left for the day, it doesn't mean that your needs for security and peace of mind has ended as well. Whether you're out for a few hours or for an extended vacation, Q-See's 4-Channel DVR lets you remotely monitor your home or business with confidence. Check in on your family, employees or keep an eye on your property with this complete surveillance system.

Offering 400 TV lines of resolution and a 40 foot (12m) night vision range, you can expect clear and crisp images from the included weatherproof full-color CMOS cameras. The enhanced 1/4" sensors capture quality images with activity. With 24 infrared LEDs at 0 lux, these cameras deliver the powerful night vision you need in low to zero light. They also come ready-made with a pre-assembled, 3-axis mount for easy placement of the camera on a wall, ceiling, or other flat surface. The smart design helps to deter vandalism with cables that route directly through the bracket. Standard 60 foot cables are included with each camera for immediate installation.

Q-See DVR+Camera bundles are a winning combination for your surveillance solution. Merging high-performance video with high-quality cameras, Q-See DVR+Camera bundles achieve excellence in home or business environments. The DVR’s user interface is simple to use and the included mouse and remote control make menu navigation stress-free. Rely on Q-See to save you money, time, and

peace of mind with competitive prices, strong warranties, easy installation, and lifetime technical support.

KEY FEATURES:

Recording Resolution
The QC444 surveillance DVR records video in real-time CIF resolution and in broadcast-quality D1 resolution. At a lower frame rate, with a playback resolution of 704x480, provides you with a larger video image to better help identify people and objects.

Hard Drive
This system can support 1 A/V Rated SATA HDD of up to 2 TB. To ensure you can begin monitoring your home right away, the DVR comes with a pre-installed 500GB hard drive! The amount of footage that you can save on the hard drive before needing to over-write footage will depend on the size of the hard drive, recording and resolution settings you select during setup.

Remote Monitoring
Remotely monitor and manage your home or office 24/7 from anywhere around the world via the internet using a Windows PC, Mac, or a supported 3G/4G Smartphone, including iPhone™/iPad™, Android, Blackberry™ OS 5 & 6, and Windows Mobile Pro 5 & 6. Enjoy additional peace of mind by receiving instant email alerts with snapshot images when motion is detected, when the hard drive is full, or when and if video loss has occurred. Up to 10 users can remotely log into the DVR at the same time

and the system's dual-stream technology allows for easier internet access at lower bandwidths.

DVR FEATURES:

H.264 COMPRESSION
H.264 Compression minimizes file size in order to maximize the hard drive's recording time, as well as transfer video for viewing over the internet.

MULTI-TASKING FUNCTIONALITY
The multi-tasking feature allows up to five functions to occur on the system at one time: record video, watch live video or playback video, while also monitoring and managing the system remotely, and also backing up files.

DISPLAY RESOLUTION
When watching video live, the display resolution is 704x480. When playing back previously recorded video, the resolution will depend on the recording settings selected during setup (see CIF/D1 recording resolution for more information).

VGA CONNECTION
Connect a VGA monitor to the Video Out Port to serve as a large display or allow viewing in another room.

THREE VIEWING MODES

Select from 3 different viewing modes:

- Single Cam: Display 1 camera at a time.
- Cam: Display 4 cameras at once on a split screen
- Timed Auto-Sequence: Display a timed-auto sequence, which shows each camera for a few seconds and rotates the view through all cameras one at a time.

CONVENIENT BACKUP
Backup video files from the surveillance system to a PC, Flash Drive or USB Hard Drive in order to free-up space for new video while retaining important footage.

FOUR RECORDING MODES

Select from 4 different recording modes:

- Advanced Motion Detection:
  Advanced motion detection settings help to minimize false alarms. The easy-

to-use motion detection set-up screen allows you to mask out certain areas which frequently experience heavy movement in order to avoid false alarms and unnecessary triggers.
- Time-Schedule: Record based on a pre-set schedule that you choose depending on your needs. For example, only at night, only during office hours or only during non-business hours.
- Alarm Sensor Trigger: Only records when the alarm sensor has been triggered. (Alarm sensor not included.)
- Manual: When set to manual, the system can be turned on to record 24 hours a day, 7 days a week or until you manually turn it off.

CAMERA FEATURES:

40 Ft of NIGHT VISION
The cameras are each equipped with 24 infrared LED lights that can record at a distance of up to 40 feet in the dark

400 TV Line, CMOS RESOLUTION
This CMOS camera captures 400 TV lines of resolution with its Sony HAD 1/4" CMOS Image Sensor, allowing for a higher quality picture than most surveillance cameras.

WEATHERPROOF CAMERAS
Weatherproof cameras are suitable for both indoor and outdoor use.

COMPATIBILITY
